

Scenario 1:

3.1.3 - Moral and ethical issues

Situational awareness.

Facial expressions and emotions

Ask how they are

Behavioural attitude towards things may change

They may work less or talk less to people

Unexpected bruising or cuts

Comfort, Check, Tell

Scenario 2:

3.1.2 - Moral and ethical issues

Diversity with patents

Legislation

Every patient is different

Accessibility - the developers must consider: colour blindness

Whistleblowing - Encourage workers to speak out against mistreatment within the workplace

Strategic planning - long term planning

Internal Policy Document - Internet usage, health & safety

Company culture - Blueprint, everyone is different

Scenario 3:

3.2.1 - Moral and ethical issues

Sustainable

Renewable energy

Safer due to technologies such as security cameras, sensors and speech recognition.

Interconnected worlds create convenience since a majority of devices can be connected together

Scenario 4:

3.1.1 - Emerging trends and technologies

Unequal access to technology and/or digital services (Digital Divide)
